linkedin.com/in/r-j-thompson-9531588 | github.com/rj45Thompson | rj45thompson.github.io/anchor-demo

Senior C++ / C# engineer. 30 years shipping real-time systems: game engines and tooling, low-level networking, and regulated medical-device software. Canadian citizen working remotely from Alberta: no visa, sponsorship or petition needed to engage me.

CURRENT WORK

Lead developer, tactics RPG in development

2025 - present

Contract lead developer at a small independent studio. I build the engine and tooling: a **33,000-line** level and terrain authoring tool that replaces the Unity interface, a **132-route** HTTP bridge that lets scripts and agents drive the editor headlessly, the tactics camera and battle cinematics, and a Unity to **Unreal Engine 5** VFX converter that moved all **65** particle emitters into Niagara.

Verification and calibration for AI systems

2025 - present

A knowledge engine with **no neural weights** over **66.4M facts**, running entirely in the browser: it reports a measured confidence per inference chain and abstains rather than guessing. Published with its own retraction - the headline result was withdrawn when a constant-guess baseline passed the same gate at 88.9%, and the corrected figure was re-measured on four orders of magnitude more evidence. Related public datasets: BossBench and WarShip on Hugging Face.

EXPERIENCE

Uthervse

Jan - May 2025

Assistant to Lead Developer on a four-month contract. Live virtual-world platform operations, plus hiring, training and departmental planning.

BioWare

May - Aug 2024

Shipped the dialog and narrative system for **Dragon Age: The Veilguard** on Frostbite. Mentored developers on the Frosted cinematic and narrative system.

Eden Industries

Feb 2022 - Dec 2023

Client work in C++ and Unity. **Activision, Call of Duty**: shipped a new live ops system. **Operation Tango**: ported low-level networking and real-time voice chat to **Nintendo Switch**. **Kabam, Disney Mirrorverse**: fixed difficult low-level threading and networking faults.

Sega / Relic

Jan 2021 - Jan 2022

Company of Heroes 3. Profiled and optimized a C++ system for a measured **7%** performance gain on the shipping title, and wrote build tools for Perforce and the pipeline's hot reload.

Electronic Arts

Oct 2016 - Sep 2020

Four years on the Frostbite editor: editor frameworks, cinematics, schematics and lighting workflows. Architected MVVM upgrades to the legacy visual coding diagram library, wrote a crash control and recovery application, added Azure telemetry, and helped architect the keyframe editor.

Unity (Finger Food)

Apr 2015 - Sep 2016

Development Team Lead across **Skylanders**, **Star Wars BB-8** and Call of Duty. Accelerated Skylanders asset-bundle loading by **200%**. Shipped Skylanders Imaginators on iOS and Android.

Industrial Alliance

Aug 2014 - Feb 2015

Architected Unification in .NET. WPF, WCF, MVVM.

Microsoft Big Park

Apr 2013 - Aug 2014

Real-time Lua UI for NFL, ESPN and UFC on Xbox.

Novadaq

Apr 2012 - Apr 2013

Lead architect, **SPY ELITE**. Regulated surgical fluorescence-imaging medical device.

FinancialCAD

Sep 2010 - Apr 2012

Lead architect, Silverlight / XNA presentation layer.

Neoteric

Jul 2004 - Jun 2010

Win32 / C++ UI libraries. Led a team of four, with hiring and training.

Earlier: Max Integration, project lead on a Win32 CRM (2004) · RedHawk Gaming, subsystems and device drivers (2001-03) · Infowave, QA lead of five (1997-01) · Electronic Arts, QA on NHL 98, Need for Speed, Warcraft II (1996-97)

SKILLS

Languages: C++ (11/14/17), C#, Python, Lua, JavaScript, SQL

Engines: Frostbite, Unity, Unreal, Havok, Essence

Systems: multithreading, memory management, real-time networking, profiling and optimization

UI: WPF / XAML, MVVM, Win32, custom editor frameworks
